

Objective

Aspiring machine learning engineer with a strong foundation in software development, including Python, Java, and system design. Currently pursuing dual degrees from IIT Madras and Dr. Mahalingam college of engineering and technology. Eager to build intelligent systems through hands-on learning and application of ML principles. I am now keen to pivot my focus towards machine learning and am actively seeking opportunities to develop specialized skills in this domain. I am excited to immerse myself in key ML topics and am confident that this experience will empower me to contribute to building the next generation of intelligent.

Education

Dr. Mahalingam College of Engineering and Technology, Pollachi, Tamil Nadu, India. Sep 2023 – Sep 2027
B.Tech in Artificial Intelligence and Data Science
CGPA: 8.5/10

IIT Madras, Chennai, India Jun 2024 – Present
BS in Data Science and Applications (Virtual Program)
CGPA: 8.0/10

Technical Skills

- **Programming Languages:** Python (Proficient), C, C++, Java, SQL, HTML
- **Frameworks & Libraries:** Django, Pandas, NumPy, TensorFlow, JAX
- **Tools & Platforms:** LeetCode, HackerRank, PowerBI, Excel
- **Core Areas:** Data Structures, Data science, Statistical Analysis, Problem Solving, Artificial Intelligence

Experience|Github profile

Portfolio for Statistics1 | IITM | [Explore Portfolio](#) Jul 2024
• Developed an interactive statistics portfolio to analyze and apply statistical methods to real-world datasets, providing practical insights and data-driven decision-making skills

Oil Software | *Python, Tkinter, SQL* Dec 2024
• This software helps users to store all the stock and sales details including bulk and retail orders separately
• The home UI displays all the information about stock details. It shows the recommended stocks to be purchased for a particular order

Batsman score prediction | *Python, Pandas* Jan 2025
• Initial csv file have been converted to ipl players data using data preprocessing code (data cleaned)
• The selected players probability of scoring 50+ runs in upcoming matching has calculated theoretically and using monte carlo simulation

Awards

- **Topper Badge** - IIT Madras (Computational Thinking, Python)
- **Winner** - Code Clash by IEEE and Return of the Coder by DigiFlash (Python Competitive Programming)

Additional Information

- Conducted Python & AWS workshop for 60+ students, covering programming basics and hands-on coding and Successfully received positive feedback
- Class Representative – Organized technical events and improved student-faculty engagement
- Attended NPTEL+ session on Forecasting with ML Tools by Dr. Natarajan Gautam
- Solved 170+ LeetCode problems; 20+ optimized with top runtime efficiency
